

Ceiling Lift System Guide

A. Structural Attachment Point The attachment point where the ceiling track is installed to the building ceiling structure, above the visible ceiling.

B. Threaded Rod This acts as the attachment point between the ceiling track bracket and the upper structure when the ceiling is suspended. Vancare also recommends the use of pendants.

C. Ceiling Bracket Brackets support the lift Track.

D. Ceiling Track The ceiling track serves to carry the ceiling lift and/or track accessories.

E. Traverse Track The traversing track moves along the fixed rails to allow for use of the lift in all areas that the track encompasses. This configuration is known as an X-Y gantry or room covering system.

F. Charging Station Can be located at any point along the rail, but most commonly at the end of the rail.

G. Traverse Carriage Wheels ride inside the fixed rails and are attached to the traverse track.

H. Ceiling Lift C-series motor shown, variety of ceiling lifts are available in differing weight capacities.

I. Sling Bar Attached to ceiling lift strap. Acts as the attachment point to the patient slings.

J. Lift Strap Connects lift to sling bar. Raises and lowers using pneumatic hand control.

K. Sling Slings support safe transport or positioning of patient. Sling straps connect to sling bar.

L. Gate Assembly Facilitates the transfer from an X-Y gantry system to a straight rail leading to an adjacent room.

M. Straight Track A section of track that can access various points in the room. Available in various lengths and curved designs.

N. Modified Door Header Opening above doorway to allow the track to pass through into another room.

A-Series Ceiling Lifts

The A-Series Ceiling lifts from Vancare represent the next generation in lifting and handling technology. The A-Series lifts are offered for maximum loads of 450 lbs. and 625 lbs., named respectively the A-450 and A-625. The A-series features a user friendly handset for easy and comprehensive operation providing real time information on its display for its 3 modes of operation: control, weighing and diagnostic.

In addition to the new enhanced controls, the A-Series Ceiling Lifts offer a variety of other features including a new trolley design that reduces turnaround time for service, a 15 degree motor tilt to help facilitate repositioning during lifting and transferring activities, optional WiFi for ease access of STATS and diagnostics information, antimicrobial strap with wear indicators, emergency down, emergency stop to name a few of them.

With four power/charging options, including return to charge, continuous charge, the new On-Cable charging feature, and external handset wall cradle, this lift can be used in a variety of settings.

C-Series Ceiling Lifts

The Vancare C300/C450/C625 and C1000 fixed motor ceiling lift system delivers world class style, function and affordability. The C450/C625 and C1000 have been designed with a full set of standard features and can be safely operated by a single caregiver. Built for quiet operation, it provides a smooth and effortless transfer which safely enhances the working conditions of caregivers. The C300 lifts up to 300 lbs. C450 lifts up to 450 lbs. The C625 lifts up to 625 lbs. The C1000 lifts up to 1000Lbs. Lift counter, PM alarm, hours of use are just some of the standard features we offer in the C series ceiling lifts.

P-Series Ceiling Lifts

The VANCARE P-300 Portable Ceiling Lift with it's 300 lbs. capacity and lightweight design (6.7 lbs.) as the lightest portable ceiling lift on the market, this device can be easily relocated to multiple rooms with little effort from the caregiver. At 10.5 lbs the P-440 is easy to hand and move from room to room. Use with standard 2-point foldout hooks or attach 4-point bars. Onboard controls include up and down buttons as well as an emergency down button. A pneumatic two button hand control enables up and down functions without the risk of electrical wiring. Safety mechanisms include an over-speed governor, built-in safety limits, slack strap sensor and emergency lowering. The P-440/600 offers a comfortable built-in ergonomic handle, allowing the caregiver to carry and transport with ease. The P-600 is equipped with a digital display, that offers real-time feedback on battery life and the total number of lifts performed.

Accessories

The difference between a good ceiling lift and a great ceiling lift is the accessories. Whether it is a specialty sling, Vanderclip's or repositioning sheets, these accessories are what put the power of the motor into action. Here are some of the many choices available from Vancare.

Scale

A traditional digital scale is available for all of the fixed motor ceiling lift models. It has zero (tare) function and automatic recall of the last weight recorded.

Ambulation

Many injuries to healthcare workers result from ambulation patients who are at risk of falling. This is especially common in rehab departments. A ceiling lift can be installed as a straight rail over parallel bars or and an X-Y gantry that gets multiple uses throughout the PT area or complete a cycle of options.

Slings

Vancare manufactures slings in its state of the art sewing facility. We stake our reputation on quality because the patient's safety and comfort rely on the sling. Vancare offers a variety of styles and materials to fit everyday needs and specialty cases. Go online to vancare.com to see the full selection of styles and materials.

Disposable

While most manufactures have chosen to buy their disposables from foreign countries, Vancare manufactures theirs here in the U.S.A. Why? Quality! Your patient's safety relies on the sling. Vancare refuses to put profitability before safety.
